#### AD506 Management Information Systems

This module is providing an overview of how the information systems are used in organisation for achieving the operational goals and meeting strategic. It is a manager's job to learn to use technology to enhance productivity and effectiveness in the workplace. Workers and managers alike find both work and technology more rewarding when they understand how technology supports everyday task performance. This course is designed to inform potential managers and knowledge workers in all functional areas about issues, benefits, and problems related to the use and management of information systems in business.

Effective Date: 15 July 2021 Version: 1.0 GSTM-ACD-136

## AD518 International Logistics and Shipping Management

The module focuses on the growing importance of international logistics and shipping management in the global supply chain. The students must familiarise with the fundamental knowledge and skills of international logistics and how they can be applied to help firms achieve cost and service advantages in the world's marketplace, by integrating the logistics concept into the business and applying appropriate methods for specific logistics management problems at different international contexts

## AD519 E-Business and Information Technology Law

The module focuses on the law relating to ebusiness and information technology law which will help the students to have a good understanding of the latest framework and development within this burgeoning of law.

There are more, and more companies and organisations are embracing information technology to add value to their business and remain competitive. In the e-business environment, the existing business law is being applied in a new setting to address specific issues that online business creates. Students must understand the interface between business, ethics and technology law environment and the effect of new technological developments on the law.

Real-life examples and case studies motivate the students and put theory in perspective to provide students with the legal context of today's businesses and technological developments.

## AD520 Green Supply Chain Management and Big Data Analytics

Change is inevitable, and as supply chain managers prepare for the future, they face many challenges. Two major trends over the last few years are the growing importance of 'big data' and analysing these data though 'analytics'. Big data analytics is playing an instrumental role in improving supply chain management. It resolves several pain points at strategic, operational, and tactical levels.

Big data is making an impact on all supply chain activities. It ranges from improving delivery times to identifying ways to reduce the communication gap between manufacturers and supplier. Analytics reports enable decision-makers to achieve operational efficiency and monitor performance to improve productivity. Supply chain analytics augment data-driven decisions to reduce costs and improve service levels.

Effective Date: 15 July 2021 Version: 1.0 GSTM-ACD-136

## **ADIA508 Industry Attachment**

Industrial Attachment is an important aspect and a component of a students' development. As part of the course curriculum, students are expected to undertake a 24 weeks/ 6-month industrial attachment in the related industries. Students will take an internship programme with hotels, resorts or any other related tourism/hospitality businesses as related to their interest or area of specialisation.

The learning objective of the Industrial Attachment is to help students:

- Contributing to local industry and developing work-based skills in the workplace environment improve the right kind of work attitude and professionalism so the student can become effective and productive in their future organisations, much sooner than is usual for fresh graduates without such experience.
- enhancing the classroom learning experience through involvement in industrial and commercial exposure
- enabling students to relate theoretical concepts with practical situations
- Improve student's cross-cultural communication skills be able to adapt quickly and effectively to working life upon graduation from GSTM.

GSTM will facilitate in the arrangement and process of student's entire Industrial Attachment. Industrial Attachment applies to all students.

## ADIP509 Industry Project

Industrial Attachment is an integral part of the course. In the unlikely event that a student cannot be placed for Industrial Attachment, due to circumstances beyond the control of the student or the college, like non-approval of the Training Work Permit by Ministry of Manpower, the student will be required to complete an Industrial Project (5000 words) under the supervision of a lecturer from GSTM.

The industrial project (5000 words) topic must be relevant to the tourism/hospitality industry and approved by the school. Students have a maximum of 2 months to complete the project after approval. The Industrial Project provides an opportunity for students to integrate their knowledge through application to a practical based classroom project within the selection of the student's choice of industry. Preferably, this project focuses on an identified management issues and/or opportunity of an organisation.
