

Diploma in Psychology Studies

OVERVIEW

The Diploma in Psychology Studies is a comprehensive program designed to provide students with a foundational understanding of psychological principles, communication skills, and insights into human behavior within various contexts. The course serves as a solid introduction to the diverse field of psychology, exploring its application in business, society, and counseling contexts.

PROGRAMME OBJECTIVES:

The Diploma in Psychology Studies is a comprehensive foundation-level program designed to provide students with a strong foundation in psychology and related fields. This diploma consists of six modules that cover a wide range of topics, from the fundamental principles of psychology to essential skills in business communication, organisational behaviour, digital society, counselling, and cognitive psychology. This program equips students with the knowledge and skills necessary for a successful career in various fields related to psychology.

DURATION COMPONENTS:

Classroom Training Hours: 30 Hours Per Module

MODULE SYNOPSIS:

DS325 Introduction to Psychology

This foundational module introduces students to the fundamental theories, concepts, and methodologies within psychology. It covers topics such as human behaviour, cognition, personality theories, and research methods used in psychological studies.

DS301 Business Communication and Report Writing

Focusing on enhancing communication skills within professional settings, this module emphasises effective business communication, including written reports, presentations, and interpersonal skills crucial in organizational contexts.

SD403 Organisational Behaviour and Analysis:

Students delve into the study of individual and group behavior within organisational settings. Topics include motivation, leadership, group dynamics, and organisational culture, providing insights into human behaviour in the workplace.

DS316 Exploring the Digital Society and Culture

This module examines the impact of digital technologies on society and culture. It explores how technology shapes human behaviour, relationships, and societal norms, offering a psychological perspective on the digital era.

ASSESSMENT METHODS:

Combination of Coursework and Examination

PROGRAMME OUTCOMES:

Upon successful completion of the course, students will have developed the ability to:

- Demonstrate a solid understanding of the foundational principles and theories of psychology.
- Communicate effectively in both written and verbal forms, especially in professional settings.
- Analyse and interpret organisational behaviour and contribute to effective management practices.
- Evaluate the impact of digital technology on society and culture.
- Apply the fundamental principles of counselling in various contexts.
- Understand and analyse cognitive processes in human behaviour

DS326 Foundations of Counselling

This module lays the groundwork for understanding counseling theories, techniques, and ethical considerations. Students explore the principles of active listening, empathy, rapport-building, and basic counseling skills necessary for effective communication and support in various interpersonal contexts.

DS327 Cognitive Psychology

Focused on the exploration of mental processes, this module delves into cognitive psychology, covering topics such as memory, perception, problem-solving, and learning. Students gain insights into how individuals acquire, process, store, and retrieve information, understanding the underlying mechanisms of human thought and behaviour.
