

# Students' Testimonial

“GSTM provides a comfortable studying environment for us. I am able to gain a lot of construction knowledge from the lecturers. They are professionals in their field and are very experienced and knowledgeable. GSTM is a multi-racial school where I can meet many races and students from different countries. This allows me to experience different cultures and we are like a big family in one classroom. I am proud to be a student of GSTM.

GSTM’s lecturers and staffs are always there to assist me when I face difficulties be it in study, exam preparation or assignment submission. They always provide revision and help us to understand and guide us. GSTM lecturers are all experienced and what they have taught me has equipped me for my work and meets the standards in Singapore.

They explain us the most important point in each subject or course. I am sure that what I learned in GSTM can be applied to my work.

I have been working in the construction industry for more than 15 years. The theories that I learned in GSTM coupled with my practical experience have enabled me to understand work situation in a better light. When I was at GSTM, I am able to ask more in-depth questions and get a deeper understanding. The course is stimulating and I have learned a lot. It drives me to strive for bigger and better things. For me, GSTM is also about the people and the friendships. I love the networking opportunities that come from being at GSTM and forming bonds with friends who will be lifelong connection.

GSTM provides quality education. I am highly recommended GSTM to those who are interested to further their study in civil engineering and construction.”

“I see great potential in Facilities Management and have always wanted to upgrade myself but did not find a good program for facilities management. After studying the program structure and considering it to be a right choice, I find it easy for me to concentrate and complete the program.

All the trainers are from the Industrial background and are knowledgeable. They are able to draw on their experience and put them into examples. The group was also in a manageable size, making it easier for the trainers to be able to explain clearly to all of the students.

GSTM staffs are approachable, friendly and are always there to assist you. Lecturers are able to fully draw on their experience to explain with real life examples. This makes it less time-consuming and easier to absorb as we are all tired after a long day. They also value add the knowledge that we have accumulated over the years.”

"I chose to enrol in GSTM's Bachelor of Science (Honours) in Quantity Surveying (Top Up) because I was interested in the Quantity Surveyor role and googled on the available courses and this was one of the courses I found.

Being a student in GSTM, I was able to explore more in the course hence gain more hands-on knowledge through the course outline established by GSTM and BCU. I found this helps towards building my career path. I was also able to widen my network as I met many friends through coursework.

The lecturers are very knowledgeable and I have an enjoyable time studying in GSTM. I also believe what I was taught will be able to bring me to greater heights.

This program has given me many opportunities during class activities and projects to work as a team. I've learnt to work better in a group with different classmates from other courses to work towards completing a project. I am thankful to be able to graduate from GSTM and the knowledge I've gained through the course."

"My favourite part about being a student at GSTM was that all the lecturers are very patient and helpful. They also possess excellent teaching skills.

After completing the program, I have more confidence in my job. I am more knowledgeable in the construction management and my job performance has also improved. The company recognizes my significant improvements and contributions towards the team. Thus, they promoted me from being a site supervisor to a site engineer."
