

FACILITIES MANAGEMENT WAY TO BUSINESS SUSTAINABILITY

R.S.V.P

OUTLINE

Sustainability is no longer an issue for tomorrow, but a significant consideration for today. In recognising the growing awareness of sustainability, Building and Construction Authority (BCA) had highlighted that Facilities Management (FM) companies have to do more than delivering sustainable services to clients; they also have to stay in business and prosper. More capabilities in facility management will be needed to manage the growing number of sustainable developments in Singapore.

According to Mergers and Markets, the FM market is expected to grow at the highest compound annual growth rate of 14.4 percent between 2016 and 2021, a boom driven by clients anxious for high-business performance and more efficient business decisions.

DATES / TIME
1 & 2 Dec 2018,
9am - 6pm
